

**Tools for Investing in Asia**

# **FINASIA**

**Integrated Software and Data For Financial Institutions**

# Profit From Our Experience

**FINASIA is the product of 15 years of experience in collecting financial data and providing useful data solutions for institutional investors.**

**We are committed to offering timely and reliable data on ALL companies in Asia delivered through our proprietary software. This interface allows effortless screening and manipulation of large amounts of financial data, all of which is constantly refreshed and updated. Our database of is accessible through the Internet from any location, offering instant access to ten years' of quarterly reports on over 6,000 companies, with hundreds of line items per financial statement, shareholder information, stock data, foreign exchange data, etc.**

**Thanks to our local knowledge, we are able to provide the most timely and reliable data on Asian companies. Our promise to you is simple: timely and reliable data covering all companies in the Asia-Pacific region, ex-Japan.**

**Our database covers the 17 exchanges in all 8 major countries of the region and all data is fully convertible into all major world currencies. We have worked with all major financial institutions for many years and we look forward to serving the data needs of all institutional investors in the region.**

- **Dividends**
- **Sector Classification**
- **Stock Prices**

# Combat Data Overload

You will find up to 400 data points per financial statement including Profit & Loss, Balance Sheet, and Cash Flow statements. In addition, supplementary data ranging from pension liabilities to inventory breakdown are extracted from the notes to financial statements and integrated into the financial templates. Results can be retrieved from consolidated or non-consolidated statements, results are available on a quarter-by-quarter, rolling 12-months or cumulative basis, etc. In addition, our system gives you the flexibility to work on *precisely* the data that is relevant to you and eliminates data overload, to help you create the analytical templates that best fit your analysis. You can even convert local currency figures into any one of 17 different currencies, from the Australian dollar to Euros to U.S. dollars. Finally, with a history of financials as far back as 1996, you can rest assured that you will have enough information to adequately identify trends, anomalies, and opportunities.

# **Make our Software Work for You**

**Our software is a powerful, full-featured analytical tool that allows you to quickly and easily screen, analyze, compare and graph. Although there are many investment analysis programs, very few can provide the seamless, effortless interface offered by FINASIA. And because our software is Internet-based, you can access the data you need anytime, anywhere.**

**The data can be customized to your specific criteria to fit your analysis. Any one of the thousands of items from the database can be used for analysis, either in absolute or relative terms, compared to its own time-series, other companies or with a benchmark. Financial Statements as well as price series can be viewed and analyzed in any of 17 different world currencies. In addition, the software has a number of pre-calculated financial ratios to facilitate your work.**

**Thanks to the efficient Data Selector, you only download the data that you need, in exactly the form and format that you want it. You no longer have to sort through reams of data and then convert it through a laborious process; our software does it all for you. And because we cover all listed companies in the region, you will no longer lose time tracking down the data you need or working with obsolete data.**

**The Graphing function allows for quick, visual identification of trends or irregularities as well as being useful for increasing the impact of your presentations to clients. The graphing tools allow you to compare and contrast results within a given company, between companies, over the time period and with the frequency of your choosing. Use the full power of Excel and our interface for all your presentations.**
